

MOTION REGARDING CENTENNIAL PARK

Whereas the VNC Board has supported several different elements to be added to Centennial Park;

Whereas the Venice Arbor Committee wishes to tie together all the proposed plans into one cohesive plan, add necessary and desirable shade trees and native plantings, and has produced the attached drawing to express the placement of all the various elements;

The VNC board of officers supports the planting of large trees and native understory, a previously supported pollinator garden, previously supported thematic Venice historical references, a shaded playground space, a native food and food forest as well as a previously supported Flying Carousel as expressed in the attached landscape plan.
