PROJECT # (For Office Use Only)

PROJECT DESCRIPTION SHEET

PROJECT DESCRIPTION (Include how many stakeholders will be working on this project.) (Maximum 500 words)

The year 2010 will be an instrumental year that will continue to rebuild the foundation of Oakwood Recreation Center for the community of Venice. So far in our quest for success, we have focused on providing quality special events and implementing seasonal programming such as sports, after-school and teen clubs. We would like to enhance each aspect of these programs with the installation of audio/visual equipment.

This instillation will benefit those individuals who utilize the park for various sports, enrichment or club programming. For example, sports teams will be able watch team games and After School, Teen and Senior clubs will be able to watch educational videos. Moreover, we are able to add family-oriented special events such as "Free Family Movie Nights". This will not only bring families together to foster a well-balanced and all-around happier family, but also instill a sense of community among Venicians. Lastly, community organizations, such as LUPC, will be able to enhance the quality of their presentations with this audio visual equipment.

IS THIS PROJECT PART OF A LARGER PROJECT? YES NO

COMMUNITY BENEFIT (Description of benefit to the entire community and justification for these benefits)

The benefit of installing audio/visual equipment at Oakwood Recreation Center is two-fold:

- (1) It will enhance the programs and activities that we provide at the park.
- (2) By providing audio/visual equipment in our Annex, community organizations will have the ability to provide effective presentations at their meetings.

WORK PLAN (Include a TIME-LINE for the project with beginning date and completion date of each phase)

MAINTENANCE PLAN (If applicable)

City Maintenance will be installing projections screen. Maintenance of item will be taken care of by facility.

COMMITTEE AND PERSONNEL SHEET

PAGE 9

COMMITTEE MISSION (Explain the Committee's mission and how this project will advance it)

The Land Use And Planning Committee is charged with the mission of advising the VNC Board on planning issues and projects affecting the Venice community. Oftentimes the applicant's presentations reference visual materials that are distributed to the committee, but copies for stakeholders are not provided.

The purchase of this audio-visual equipment will allow stakeholders attending the meetings to be able to see the same reference materials that are provided to the committee.

The equipment will be kept under the supervision of the Oakwood Park director and will also be available for other park activities and community events.

Overview

Deliver brilliant presentations, at home or in the office, with the affordable Epson EX21 multimedia projector. Powered by Epson's advanced 3LCD, 3-chip technology, the EX21 produces vibrant, lifelike images that capture and hold your audience's attention. The EX21 generates 2200 lumens of color light output and 2200 lumens of white light output for bright presentations in any setting. This powerful performance profile is complemented by a productivity-enhancing feature set that includes a portable design and USB Plug 'n Play instant setup. With this instant projection technology, the EX21 can be set up in a flash; just connect the projector to your PC and you're ready to go. Presenting is effortless too; the included remote control makes it easy to time the delivery of your presentation perfectly. This SVGA projector is truly an all-purpose solution for bright and powerful presentations virtually anywhere. Plus, the EX21 has the reliability you've come to expect from the world leader in multimedia projectors. Take it with you on the road, or keep it tucked away in your home or office. Wherever you present, the EX21 makes it easy to make an impact on your audience, without impacting your budget.

The AccuScreen 100" Electric Screen satisfies the viewing needs of the highly demanding multimedia user. BalanceView has crafted a screen surface that assimilates and optimizes the contrast and vibrant colors coming from your home theater projector.

Obviously, all hardcore multimedia enthusiasts around the world seek high-quality images which only a home theater can give. Installing the AccuScreen Electric Screen is very simple and ensures that viewing enjoyment is never compromised. It comes with a remote control, which makes it easy to make the screen work for you. More so, you may take control of the screen by means of the three-position in-line wall switch. The Synchronous Electric Motor lessens the noise to further give you a memorable viewing experience. State-of-the-art Universal Mounting Brackets complements the Euro-White steel case finish and plastic end caps. This feature allows easy installation on either the ceiling or wall. To maintain a timeless viewing surface quality, soap and water can be used. Undoubtedly, the AccuScreen 100" Electric Screen makes a fine home theater choice.

This screen is good for the price. It does not absorb light very well in the black areas but what do you expect for \$200. Also it has randomly gone up by itself a few times in the middle of watching a movie, I think this may be due to my Blu-Ray remote somehow doing it, anyways, all in all great for the price!
