- 
- 1) Visitor impacts, such as parking, litter, public drunk and urination issues.
  - 2) Quality of life issues such as those mentioned above, as well as undue (and non-legal hours) noise caused by commercial companies servicing our commercial areas and construction companies working outside of city mandated hours of operation.
  - 3) The lack of pedestrian and bicyclists access to our city, Broken, obstructed or lack of sidewalks, and bike lanes with appropriate markings and signage.

I would like to see all Venice schools rank as high as Coeur d'Alene on Ca. school aptitude testing.

- 3) **The Neighborhood Committee is tasked with promoting awareness of available City resources and services by acting as a conduit between the Board and Venice neighborhoods, assisting in community outreach and bringing neighborhood issues to the attention of the Board.**

**What are your suggestions for effectively fulfilling this obligation?**

Many Venice residents are still unaware of the VNC and its many benefits to our community. Actively engaging Venicens and helping to inform them of the VNC and it's purpose, and ways to have the VNC hear about and address their immediate community needs. \_\_\_\_\_
